Mississauga, Ontario | a226moha@uwaterloo.ca | [Github](#) | [Linkedin](#)

EDUCATION

UNIVERSITY OF WATERLOO | Bachelor of Mathematics
Faculty of Mathematics

Waterloo, ON
May 2029

SKILLS / TECHNOLOGIES

- **Languages:** Python, C#, JavaScript, TypeScript
- **Frameworks / etc.:** .NET / ASP.NET Core, Flask, FastAPI, Node.js, React, SQL Server, PostgreSQL, MongoDB, Selenium, OpenCV, LangChain, Ollama, Nginx, Tensorflow, PyTorch, SQL Server Stored Procedures, Git, Docker, Linux, Azure, AWS, Agile/Scrum, Unit Testing, Entity Framework

EXPERIENCE

Mitsubishi

AI Engineer

Mississauga, ON
January 2026 – May 2026

- Built an internal **RAG platform** for aircraft technical manuals using **LangChain, Azure AI Foundry, Ollama, PostgreSQL, Microsoft Fabric, and Azure file shares**, supporting **40** internal engineering users at deployment.
- Engineered **LLM documents ETL pipelines** to process **2,000+** technical manuals, extracting fields, summaries, and source-page metadata into PostgreSQL.
- Deployed on-prem **Ollama inference APIs** behind **Nginx reverse proxy**, serving **Gemma** and **quantized** open-source models for secure internal document analysis and retrieval.
- Developed **14+ ASP.NET Core / React** internal pages for document ingestion, validation, editing, usage reporting, pipeline monitoring, and AI output quality control.
- Integrated **MCP-style tool calling** into the internal **AI assistant**, enabling document search, page retrieval, **PostgreSQL** keyword search, web search, and inline source citations.

Mitsubishi

Software Developer

Mississauga, ON
September 2025 – December 2025

- Built **6+ ASP.NET Core / C# pages** replacing manual **SQL Server scripts** for QA call-up updates, aircraft line status updates, job updates, and Syspro service workflows.
- Developed **stored procedures, SQL scripts, and ETL** data workflows for production data fixes, validation checks, employee/job records, and manufacturing system updates.
- Automated repetitive **Syspro** and production support workflows for **100s** of production workers and dozens of **Syspro** users, reducing manual staff time spent on database update requests.
- Refactored **Entity Framework** services, **LINQ** queries, and **SQL Server** access patterns, cutting request latency by **~30%** and reducing redundant database calls across production modules.

D2DAnalytics

Software Developer

Mississauga, ON
November 2025 – December 2025

- Rebuilt authentication systems to use **OAuth 2.0 / OpenID Connect** with **Microsoft Entra ID**, enabling sliding login sessions and seamless reauthentication across frontend and backend.
- Built a backend system that **archives and indexes X (Twitter) API data**, enabling historical access to content beyond the platform's native one-week window.

PROJECTS

InternFlow | FastAPI, People Data Labs API, OpenAI API

- Engineered a recruiter discovery + outreach system using **People Data Labs's API** and **OpenAI's API** to extract, enrich, and rank candidate contacts.
- Designed a custom **scoring** pipeline (feature-based ranking + **LLM** evaluation) and **prompt-engineered** message generation for high-quality personalized outreach.
